## Etimol Etimol DFX 81 RAA

Water-based, ready for use ETIMOL

### Description:

Etimol DFX 81 RAA is a ready-for-use solution and efficiently removes flux residues from electronic assemblies. It is mostly used in spray and ultrasonic systems.

#### Note:

Consider approvals of equipment manufacturer!

### Customer added value:

- Defluxing concentrate for PCBA
- Low odour
- Eliminates corrosive and flammable chemicals
- No ionic load

### Technical Data:

Appearance:	colourless to yellow, clear liquid
Application:	ready for use
ph-value:	alkaline
Density at 20 °C:	0.995 +/- 0.005 g/cm <sup>3</sup>
Boiling point/boiling range:	>100 °C
System:	water-based (ready for use)
Flash point:	88 °C
Operations temperature:	room temperature 65 °C
Reliable cleaning results with:	flux residues
Storage conditions (recommendation):	in closed original packaging at 10 – 25 °C
Hazardous goods:	No
Durability:	36 months
